

TANIA YUNITA

Frontend Developer (ReactJS/ NextJS / TypeScript)

Bekasi, Indonesia | +62 813 9475 9375 | taniayunita.dev@gmail.com | linkedin.com/in/taniayunita | github.com/taniayunita-dev | taniayunita.vercel.app

PROFESSIONAL SUMMARY

Frontend Engineer with 3+ years of experience building and maintaining production web applications using React, JavaScript, and TypeScript across banking, e-commerce, education, and IoT projects. Experienced in micro-frontend architecture, REST/GraphQL API integration, and component-driven UI development within Agile teams. Proven track record delivering features remotely for an international distributed team (Australia, 2023-2025). available for remote Frontend Developer roles.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, PHP, HTML5, CSS3, SQL

Frontend: React, NextJS, React Native, Redux, React Hooks, React Context, Single-SPA (Micro Frontend), RedwoodJS, Electron, PWA

UI & Styling: Ant Design, Material UI, Bootstrap, Tailwind CSS, Responsive Design, Figma-to-Code

Backend & Data: Laravel, REST API, GraphQL, MySQL, Axios

Testing & Cloud: Jest, React Testing Library, AWS (basic)

Tooling & Practices: Git, GitHub, GitLab, Nx Monorepo, Postman, Vercel, Agile/Scrum, Code Review

Languages Spoken: Indonesian (Native), English (Professional working proficiency)

PROFESSIONAL EXPERIENCE

Career Break

July 2025 - September 2026

- Used a planned career break to Took a step back from full-time work to rest and reset after several years of continuous frontend delivery across multiple client projects
- Built and maintained personal web applications using React, TypeScript, Tailwind CSS, and modern frontend practices.
- Developed a recipe and meal-planning application (see Selected Projects) to practice API integration, state management, and component architecture.
- Maintained familiarity with current workflows, Git, GitHub, and deployment via Vercel.
- Fully available now and actively interviewing for a remote Frontend Developer role.

Frontend Developer | Dragatron

Australia | September 2023 - July 2025 | Full-time, Remote

- Developed and maintained web applications using RedwoodJS, NextJS, Redux, Tailwind CSS, Ant Design, and TypeScript for healthcare and food-ordering platforms.
- Translated Figma designs into responsive, reusable React components, implementing UI and frontend business logic.
- Integrated frontend applications with REST APIs using Axios, handling data fetching, form validation, loading, and error states.
- Collaborated remotely with backend engineers, UI/UX designers, and QA throughout Agile development cycles to deliver and refine product features.
- Participated in code reviews, debugging, and production issue resolution to maintain application quality and stability.

Frontend Developer | PT Walden Global Services (WGS)

Bandung, Indonesia | April 2022 - September 2023 | Full-time, Hybrid

- Developed and maintained web applications using React, including a learning platform and its admin dashboard, for client projects across retail, education, and IoT sectors.
- Translated Figma designs into responsive, reusable React components, maintaining consistency across application screens.
- Integrated frontend features with backend APIs and implemented user interactions, form validation, and application states.
- Contributed to the development workflow across Development, Staging, and Production environments, including deployments.
- Expanded into backend development using Laravel and MySQL, contributing to CRUD functionality and data-driven features.
- Collaborated with backend engineers, UI/UX designers, QA, and project managers to investigate issues and deliver features within project timelines.

Frontend Developer (Internship) | PT Bank Negara Indonesia (BNI), Tbk

Jakarta, Indonesia | February 2022 - August 2022 | Internship, Remote

- Contributed to TAPERA, a national housing-savings web platform, within a regulated banking environment.

- Implemented UI modules using React and Ant Design within a Single-SPA micro-frontend architecture.
- Integrated REST APIs using Axios and handled loading, error, and validation states for user-facing features.
- Worked within GitLab-based workflows, including branching, merge requests, and peer review.
- Collaborated with the development team to troubleshoot frontend issues and refine implemented features.

Frontend Developer (Freelance) | PT Printerous Global

Jakarta, Indonesia | December 2021 - January 2022 | Remote

- Developed product-catalogue features for a B2B printing e-commerce platform using ReactJS, Bootstrap, and Axios.
- Translated Figma designs into responsive interfaces across desktop and mobile breakpoints.
- Integrated frontend components with REST APIs to display and manage product catalogue data.
- Identified and resolved frontend issues during development to improve stability of the customer ordering experience.

SELECTED PROJECTS

Additional projects available at taniayunita.vercel.app

Recipe & Meal Planner App — Personal Project (2026)

React, TypeScript, Tailwind CSS, React Context

- Built a recipe discovery and meal-planning application enabling users to search recipes by ingredient or name.
- Implemented saved/favorite recipe management and an interactive weekly meal planner using state management and Context API.
- Developed a responsive, component-driven interface with Tailwind CSS, focused on reusable UI patterns.
- Integrated recipe data via APIs using Axios and handled loading, error, and empty states.

Restaurant Ordering Platform — Dragatron Client Project (2024-2025)

React, RedwoodJS, JavaScript, GraphQL, AWS, Jest, React Testing Library

- Developed an online food-ordering platform allowing users to browse restaurants, explore menus, manage cart, check out, pay, and track orders.
- Implemented restaurant listing, food details, search, filtering, cart management, checkout, payment flow, and order history.
- Integrated GraphQL APIs for restaurant, menu, cart, and order operations, handling data fetching and frontend state throughout.
- Implemented token-based authentication and protected routes to maintain login state and restrict authenticated features.
- Collaborated with backend engineers and UI/UX designers to translate product requirements and Figma designs into functional interfaces.

Online Learning Platform — Web App & CMS (2023)

React, Redux, Axios, Bootstrap | Laravel, MySQL

- Developed the learner-facing platform supporting video and PDF lessons, in-course quizzes, and testimonials.
- Built and maintained the companion CMS using Laravel and MySQL, implementing CRUD modules for mentors, courses, lessons, banners, and categories.
- Developed administrative reporting features for monitoring course purchases and platform activity.
- Contributed across frontend and backend layers, collaborating with the team to resolve blockers within sprint timelines.

Banking Queue Management System — Capstone Project (2021)

React, Axios, Bootstrap, PWA, Vercel

- Led a 3-person team in developing a Progressive Web App enabling bank customers to book service queue tickets remotely.
- Defined feature scope, delegated tasks, coordinated team communication, and contributed to frontend implementation.
- Deployed the application to production using Vercel and coordinated final delivery with the project team.
- Final capstone project for the Digital Talent Scholarship frontend bootcamp (Kominfo, in partnership with national banks).

EDUCATION & TRAINING

Bachelor of Engineering (S.T.), Informatics Engineering

Universitas Teknologi Bandung, Indonesia | 2016 - 2020

Frontend Development Bootcamp — Digital Talent Scholarship

Ministry of Communication and Information Technology (Kominfo), Indonesia | 2021
